From: Program Executive Officer for Strike Weapons

Subj: WEAPONS ADVANCED TECHNOLOGY REVIEW BOARD RESULTS

Encl: (1) Weapons ATRB XI ratings  
(2) Weapons ATRB XI voting meeting minutes  
(3) WATRB I-X ratings  
(4) Technology Transition Agreement format

1. The Naval Aviation Systems TEAM has completed the evaluation of technology projects presented at the Weapons Advanced Technology Review Board (WATRB) held at Patuxent River, Maryland on 12 and 25 November 03. Nineteen technology initiatives were evaluated by six program offices (PMA-201, PMA-242, PMA-259, PMA-280, PMA-281, PMA-282) from our TEAM and representatives from the Chief of Naval Operations (N78). Enclosure (1) provides the ratings assigned during that process. Specific comments from the decision meeting relating to the non-proprietary technology projects are provided in enclosure (2). Enclosure (3) contains all previous WATRB results for review, and enclosure (4) provides a blank Technology Transition Agreement (TTA) for use at the PMAs' discretion.

2. We commend the sponsoring commands and industrial partners for their participation in the process and for the quality of the technology programs presented. We encourage continued funding and transition planning for those initiatives listing Program Manager "Support" and "Endorsement" from this and previous WATRBs.

3. The interchange from this WATRB meeting was very productive and the results are provided to further assist in technology focus and transition planning. If you have any questions regarding the process or the results, contact Mr. Dave Bailey (AIR-4.0X), Manager of the NAVAIR ATRB Team, who can be reached at (301) 342-0219.
